

BENITO's ELA concrete benches installed in Santurtzi Square (Bizkaia), a glamorous meeting and resting point.

Ela Plus  
UM371LP

The benches have been strategically placed for relaxing and socialising in the city centre, making the square a more attractive place to spend one's free time.

The ELA bench is made from precast reinforced waterproof polished granite white concrete. A matte stainless steel structure anchors it to the ground. To make it more welcoming, the seat and backrest are made of wood with different slats. Its modern style makes it suitable for all types of environments.
