BENITO -Street Lighting

La Solana (Spain)

Efficient LED lighting in the football field of La Solana.

BENITO has installed new LED luminaires in the football field of La Solana, in Ciudad Real, to improve energy and economic efficiency. More specifically, 20 units of the Apolo L C3 projector model and 4 units of the Apolo L C5 model with different sizes and a wide range of powers have been installed.

The new luminaires have the ONfield control system that allows, through an application installed on the mobile phone, to manage the intensity of light according to the activity of each moment.
