Its design is simple and functional and stands out thanks to the stainless steel ring which adds a distinctive touch to this sober bollard made of iron and finished in wrought iron black.

This bollard is available in different versions: removable, flexible (made of UV-resistant Cauflex with a reflective band), with base plate and with embedded base, to meet the specific needs of every project. Bollard made of iron treated with Ferrus, a protective process that guarantees high resistance to corrosion. This treatment consists of three layers applied after shot cleaning all impurities: zinc plated, epoxy primer coating and wrought iron black polyester powder coating. Stainless steel ring.

Recommended anchoring: embedded base and threaded rods with concrete.
