

Anti-graffiti coating - **GRAFUS**

Grafus is a revolutionary material protector against graffitis and paints which, apart from protecting street furniture, regenerates its original aspect while improving and facilitating cleaning.

Grafus can be used on several materials: wood, steel, stainless steel...

The main characteristics of **Grafus** are:

- Compliance with the requirements of the ASTM D6578 standard (practice for determination of graffiti resistance)
- Interior and exterior use on metal, plastic, wood...
- Lasts several cleaning cycles
- Eco-friendly composition and treatment

- Excellent chemical resistance (solvents, acids, bases)
- Excellent resistance to scratches
- Excellent resistance to yellowing
- Great adhesion on various paint backings
